

Raising Resilient Children

What: A presentation for parents, caregivers, staff members and children that demonstrate principles of living to encourage a healthy, resilient and meaningful life. This presentation is of interest to promote a solid foundation of healthy living, and prepare children for the inevitable challenges and struggles they will face in their futures.

How: It focuses on developing personal resiliency in our children as the survival strategy for the 21st Century.

Why: Too often parents buffer their children from the reasonable and natural consequences of their own actions. Parents that overprotect or rescue their children rob them of the opportunity to develop a track record of success in dealing with the pitfalls of life. This often leaves a child without the self-worth and problem solving skills necessary to function in society. This presentation encourages children to respond to life by choice rather than react to life by chance.

Examples:

- I Overcome Failure
- II Deal with Disappointment
- III Cultivate a Healthy Self Image
- IV Delay Gratification
- V Contribute to Others
- VI Deal with Struggles of Life
- VII Become Assertive rather than Aggressive
- VIII Examine their Choices

About Sherry Campbell

Sherry Campbell M.A. RSW®RP

As an experienced workshop presenter and conference speaker, Sherry Campbell has offered dynamic workshops for organizations such as; Canada Revenue Agency, the Greenwood Group, Niagara Regional Police, Casino Niagara as well as multiple District School Boards across Ontario to name a few.
